Compiled by Mike and Mary Craymer

Editors' Note: *This is a collection of selected articles on geodesy, surveying and land information systems published in English in other subject-related journals. Only the first page is given for articles in trade journals. This information has been compiled from Tables of Contents in Geodesy (TCG), a free Internet-based contents service for journals in geodesy. For more information about TCG, article reprints and journal publishers, visit the TCG Web site at <http://www.geod.nrcan.gc.ca/~craymer/tcg/>.*

THE AUSTRALIAN SURVEYOR
1997, 42(3)

Forster, B.C., J.C. Trinder, and K.G.NettleNew Graduate Programs for Land Administration at theUniversity of New South Wales. 81-6.

Steudler, D., I. Williamson, J. Kaufmann, and D. Grant. Benchmarking Cadastral Systems. 87-106

Coombe, L.J. The Implications of GPS Data Loss on Real Time Digital Terrain Modelling. 107-15

Collier, P.A., F.J. Leahy, and V.S. Argeseanu. Options and Strategies for Transition to GDA 94. 116-25.

1997, 42(4)

Hazelton, N.W.J. A New Australian Republic: Some Implications for Surveyors. 139-47.

Young, F.R. The Changing Face of Education: Meeting the Surveying and Mapping Industry Needs. 148-56.

Iatau, M.D., and I.P. Williamson. Using the Case Study Methodology to Review Cadastral Reform in Papua New Guinea. 157-65.

Mitchell, H.L., and M. Mustaffar. A Refinement to Automated Photogrammetry. 166-71.

Stewart, M., and M. Tsakiri. The Future of RTK GPS/GLONASS Positioning in the Urban Canyon. 172-8.

Abou Beih, O.M., and D.A. Algarni. A Proposed Algorithm for Geoid Determination in Saudi Arabia Using GPS Measurements. 179-84.

Gao, Y., and J.F. McLellan. Single Point GPS Positioning Using Precise GPS Data. 185-92.

ALLGEMEINE VERMESSUNGS-NACHRICHTEN
1997, 104(10)

Fenoglio-Marc, L. Altimetry data improvement by a dual crossover method in European Seas and along track stationary sea surface topography. 354-9.

BOLLETTINO DI GEODESIA E SCIENZE AFFINI
1997, 56(4)

Ackermann, F. GPS for photogrammetry. 387-406.

Zund, J.D. An essay on the foundations of Gaussian differential geometry II: imbedding questions. 407-26.

Arrighi, A, A. Arrighi, F. Blasi, A. Di Rita, D. Grazzi, and M. Pecci. Via Georgofili: images to remember. 427-42.

Petrovskaya, M.S. On expansions of the earth's gravitational potential converging in the whole space. 443-50.

Liu, Q., and T. Parm. A generalized theory of variance analysis. 451-62.

Crippa, B. Studio della superficie di deformazione di un blocco. 463-70.

Poma, A., and E. Simeone. Elementi astronomici per il calendario dell'anno 1998 calcolati dall'Osservatorio Astronomico di Cagliari. 471-86.

GEODEZJA I KARTOGRAFIA
Vol.46, No.1, 1997

Kopacz, Z., W. Morgas, and J. Urbanski. Bathymetric Information, Its Formation Process and the Elements Thereof. 3-16.

Czaja, J. Interval Estimation of Generalized Linear Models. 17-50.

Skorczynski, A. An Algorithm to Calculate Deviation Mean Errors. 51-62.

Grabowski, R.J., A. Kobryn. The Simplified Geometrical Vertical Refraction Model at Determining Vertical Displacements by Means of the Trigonometrical Levelling Method. 63-74.

Kosinski, W. Calculations of Point Heights Differences in Closed and Bilaterally Referred Level Circuits, for the Needs of Environmental Engineering. 75-82.

Kobryn, A. Design of the Grade Line of a Route by Means of General Transition Curves. 83-
